

The WAVE Wireless Instant Notification System

Strengthen Airport Security with SecureTech

When seconds count, you need immediate response. The WAVE instant notification system responds immediately when an incident occurs. Alarm messages are automatically and instantly broadcast over your existing handheld radios automating dispatch.

“Counter 3 Needs Assistance”

The WAVE system is compatible with existing radios, so there is no added radio expense. The WAVE instantly transmits a detailed message over your radio network so officers can react immediately.

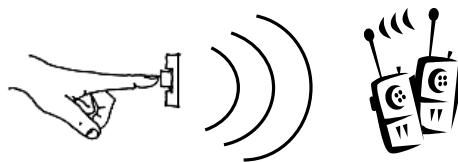

With no wires to run through walls, wireless panic buttons and other sensors can be installed easily anywhere. The wireless sensors are fully supervised giving confidence in the system’s functionality.

The WAVE can be easily integrated into existing security equipment to add value to your overall security solution.

- Instant notification over your radio network
- Silent alarm is broadcast only to officers
- Eliminates dispatch delay
- Proven technology with over 10 years of satisfied customers
- Officer safety

“Station 5 Requires Assistance”
