March 20, 2003

Dear Folks,

I wanted to write in support of your efforts at assisting the people and courts of states and local authorities. As Director of Ohio's pioneering three year, 684 courts, full building and personnel security efforts, we learned first hand the benefits of your personnel hardware and systems as well as the dedication and support that you all demonstrated over the past five years in support of our project our people and our Ohio courts.

We found that nearly 70% of our courts employed your systems and they remain firmly appreciative of these systems and the quick response that they afford. Service support and price have been very good.

I am often short in writing letters, taking a minimalist approach. I would much prefer that anyone that wants to know about our projects to secure all of the Courts of Ohio, and as a part of that SecureTech assistances and professionalism, that they email me and I can communicate with them personally. You did a good job and the work has extended well and will also extend well into the future.

Take Great Care, Be Bold!

  
Kinsley F. Nyce
