## **The WAVE Helps Out with Meeting ADA Requirements in Schools**

FORT WORTH, Texas, July 2009 – SecureTech was pleased to have been able to help a public school district in California to satisfy regulations under the Americans with Disabilities Act requiring schools to notify students with disabilities of emergencies.

The audible alarms associated with fire alarms and other emergencies within the school were not sufficient to notify deaf students of emergencies as they occurred.

The WAVE is a very versatile system and was able to provide the school with an effective solution.

Deaf students have been given Nextel phones that vibrate and display an emergency message when an alarm is received.

In this way, the disabled students are notified of emergencies at the same time as able bodied students.

### **About SecureTech Systems**

SecureTech was founded in 1994 and has installed over 1,200 systems in courts, schools, colleges, hospitals, stadiums, parks and other facilities.
