SecureTech Systems Wins Bid to Provide E-Call System for Brookfield Assisted Living

FORT WORTH, Texas, December 9, 2009 -- SecureTech Systems has won a bid to provide Brookfield Assisted Living with an e-call system for a new assisted living development in Hot Springs, Arkansas.

We are proud to welcome Brookfield Assisted living to our family of customers. The WAVE can truly offer a wireless solution that provides the flexibility and accuracy that is so important in assisted living facilities.

SecureTech's system, known as the WAVE, provides residents with intelligent buttons to notify caregivers instantly when they need help even when they are not within reach of a pull-cord. Alarms are instantly broadcast over caregivers' radios and/or pagers notifying them immediately of the detailed location of the emergency.

Unlike other wireless e-call systems on the market, the WAVE can locate residents within a facility with room level accuracy.

According to Dave Jacobs, SecureTech's vice president of sales, "One of the many exciting features of the WAVE system is that our intelligent buttons are two-way so that caregivers can acknowledge that an alarm has been received and residents can feel assured that help is on the way."

The WAVE also supports wireless fixed position pull stations and other sensors. Additional sensors and locations can be added to the system at any time.

About SecureTech Systems

SecureTech is the world's leading supplier of instant notification systems that automate dispatch by transmitting alarms directly over radio networks.

SecureTech was founded in 1994 and has installed over 1,200 systems in all kinds of facilities across the United States and Canada.
