SecureTech Systems, Inc. Joins the HGACBuy Program

SecureTech is proud to have been awarded a contract by the Houston-Galveston Area Council (H-GAC) for its WAVE instant notification system.

The HGACBuy Program is over 30 years old and specializes in high ticket, capital intensive products and services that require technical, detailed specifications and extensive professional skills to evaluate bid responses. All products offered through HGACBuy have been awarded by virtue of a public competitive process. H-GAC members can purchase products and services through HGACBuy using an expedited procurement process because H-GAC has already put bids out and satisfied the competitive process for all the products under contract.

Local governments, states, state agencies, and certain non-profit corporations from across the US can join H-GAC and participate in HGACBuy. H-GAC does not charge its members any fees for participating in HGACBuy. Details of how to join can be found on the H-GAC website at www.hgacbuy.org.

SecureTech's system, known as the WAVE, is an ideal security solution for courthouses, hospitals, schools and other campuses. When a wireless sensor such as a panic button is triggered, the WAVE instantly transmits a detailed alarm message over the radios that are carried by law enforcement officers. The alarm message provides the precise location and nature of the incident. For instance: "Emergency in Judge Smith's chambers, respond immediately."

The WAVE transmits alarms to officers instantly without any dispatch delay. When a situation becomes violent, time is everything. Seconds count. The WAVE saves those precious seconds.

SecureTech Systems is the world's leading supplier of wireless instant notification systems for courthouse security. SecureTech was founded in 1994 and has installed over 1,400 systems in courts, schools, colleges, hospitals and other facilities nationwide. References are available upon request from SecureTech.
