

The WAVE Wireless Instant Notification System

Enhance School/Campus Security with the WAVE

“Emergency in Classroom 101”

The WAVE is flexible and cost effective. When wireless sensors are triggered, it transmits a pre-recorded alarm over your existing radio network. First responders can react immediately without any dispatch delay.

With no wires to run through walls, wireless panic buttons and other sensors can be installed easily in offices, classrooms, cafeterias, libraries, laboratories, computer labs, etc.

The WAVE system can be easily integrated into existing security equipment to add value to your overall security solution. Security is free to patrol the campus for yet still respond effectively when needed.

System Features:

- Transmits unique, detailed, customized messages to all hand-held radios and base stations in the radio network
- Messages are easily added or changed
- System can trigger other devices such as strobe lights or signs
- Compatible with a wide variety of sensors, including panic buttons, tilt switches, door/window contacts and motion detectors
- Sensors can be scheduled to be on or off during specified hours based on a customized schedule
- Compatible with VHF, UHF, 800 MHz or any other commercially available frequency
- Battery backup included
- Two year warranty provided with all new systems

We have over 1,000 satisfied customers nationwide!
