

WAVE System Specifications

Wireless Trip Beam

This trip beam includes a wireless transmitter which has superior range and reliability. The trip beam can be used to control access to construction sites or other restricted areas.

Key Features

- Indoor/outdoor use
- Selectable NO or NC
- Range is up to 30ft outdoor or 60ft indoor
- Pulsed infrared, single beam, scaled optics
- Variable beam interruption time
- Line of sight and VOM alignment
- Fully supervised

Technical Specs

Dimensions:	5.5”h x 4.2”d x 3.4”w
Weight:	Transmitter: 10.5oz Receiver: 10.5oz
Operating Environment:	-4° to 140°F up to 90% relative humidity (non condensing)
Battery:	12V – up to 7Ah
Battery Life:	Variable - up to 40 hours
